

Red Hat Training and Certification

DO188 - Introduction to Containers with Podman

Travis Michette

Version 1.0

Table of Contents

1. Introduction and Overview of Containers	1
1.1. Introduction to Containers	1
1.2. Introduction to Kubernetes and OpenShift	1
2. Podman Basics	2
2.1. Creating Containers with Podman	2
2.1.1. Introducing Podman	2
2.1.2. Working with Podman	2
2.1.2.1. Pulling and Displaying Images	2
2.1.2.2. Running and Displaying Containers	2
2.1.2.3. Exposing Containers	2
2.1.2.4. Using Environment Variables	2
2.2. Accessing Containers	2
2.2.1. Container Transparency	2
2.2.2. Start Processes in Containers	2
2.2.3. Open an Interactive Session in Containers	2
2.2.4. Copy Files in and Out of Containers	2
2.3. Managing the Container Lifecycle	2
2.3.1. Container Lifecycle	2
2.3.2. Inspect a Container	2
2.3.3. Stop a Container	2
2.3.3.1. Stop a Container Gracefully	2
2.3.3.2. Stop a Container Forcefully	2
2.3.3.3. Pause a Container	2
2.3.4. Restarting a Container	3
2.3.5. Remove a Container	3
3. Container Images	4
3.1. Container Image Registries	4
3.1.1. Container Registries	4
3.1.2. The Containerfile	4
3.1.3. Red Hat Registry	4
3.1.3.1. Useful Container Images	4
3.1.4. Quay.io	4
3.1.5. Manage Registries with Podman	4
3.1.6. Manage Registry Credentials with Podman	4
3.2. Managing Images	4
3.2.1. Image Management	4

3.2.1.1. Image Versioning and Tags	4
3.2.1.2. Pulling Images	4
3.2.1.3. Building Images	4
3.2.1.4. Pushing Images	4
3.2.1.5. Inspecting Images	4
3.2.1.6. Image Removal	4
4. Container Networking	5
4.1. Container Networking Basics	5
4.1.1. Container Networking Basics	5
4.1.2. Managing Podman Networks	5
4.1.3. Enabling Domain Name Resolution	5
4.1.4. Connecting Containers	5
4.2. Accessing Containerized Network Services	5
4.2.1. Port Forwarding	5
4.2.1.1. List Port Mappings	5
4.2.2. Networking in Containers	5
5. Persisting Data	6
5.1. Volume Mounting	6
5.1.1. Copy-on-write File System	6
5.1.1.1. Implications of a COW File System	6
5.1.2. Store Data on Host Machine	6
5.1.3. Storing Data with Bind Mounts	6
5.1.3.1. Troubleshoot Bind Mounts	6
5.1.4. Storing Data with Volumes	6
5.1.5. Storing Data with a tmpfs Mount	6
5.2. Working with Databases	6
5.2.1. Stateful Database Containers	6
5.2.2. Good Practices for Database Containers	6
5.2.3. Importing Database Data	6
5.2.3.1. Database Containers with Data-loading Features	6
5.2.3.2. Data Loading with a Database Client	6
5.2.4. Red Hat Database Containers	6
6. Custom Container Images	7
6.1. Create Images with Containerfiles	7
6.1.1. Creating Images with Containerfiles	7
6.1.2. Choosing a Base Image	7
6.1.3. Containerfile Instructions	7
6.1.4. Container Image Tags	7

6.2. Build Images With Advance Containerfile Instructions	7
6.2.1. Advanced Containerfile Instructions	7
6.2.2. The ENV Instruction	7
6.2.3. The VOLUME Instruction	7
6.2.4. The ENTRYPOINT and CMD Instructions	7
6.2.5. Multistage Builds	7
6.2.6. Examine Container Data Layers	7
6.2.6.1. Cache Image Layers	7
6.2.6.2. Reduce Image Layers	7
6.3. Rootless Podman	7
6.3.1. Container Workload Isolation	7
6.3.2. Analyzing Rootless Containers	8
6.3.2.1. Changing the Container User	8
6.3.2.2. Explaining User Mapping	8
6.3.2.3. Limitations of Rootless Containers	8
7. Multi-Container Applications with Compose	9
7.1. Compose Overview and Use Cases	9
7.1.1. Orchestrate Containers with Podman Compose	9
7.1.2. The Compose File	9
7.1.2.1. Start and Stop Containers with Podman Compose	9
7.1.3. Networking	9
7.1.4. Volumes	9
7.2. Build Developer Environments with Compose	9
8. Troubleshooting Containers	10
8.1. Container Logging and Troubleshooting	10
8.2. Remote Debugging Containers	10
9. Container Orchestration with OpenShift and Kubernetes	11
9.1. Deploy Applications in OpenShift	11
9.2. Multi-pod Applications	11

Chapter 1. Introduction and Overview of Containers

1.1. Introduction to Containers

Section Info Here :pygments-style: tango :source-highlighter: pygments :toc: :toclevels: 7 :sectnums: :sectnumlevels: 6 :numbered: :chapter-label: :icons: font :icons: font :imagesdir: ./images/

1.2. Introduction to Kubernetes and OpenShift

Section Info Here :pygments-style: tango :source-highlighter: pygments :toc: :toclevels: 7 :sectnums: :sectnumlevels: 6 :numbered: :chapter-label: :icons: font :icons: font :imagesdir: ./images/

Chapter 2. Podman Basics

2.1. Creating Containers with Podman

Section Info Here

2.1.1. Introducing Podman

2.1.2. Working with Podman

2.1.2.1. Pulling and Displaying Images

2.1.2.2. Running and Displaying Containers

2.1.2.3. Exposing Containers

2.1.2.4. Using Environment Variables

2.2. Accessing Containers

2.2.1. Container Transparency

2.2.2. Start Processes in Containers

2.2.3. Open an Interactive Session in Containers

2.2.4. Copy Files in and Out of Containers

2.3. Managing the Container Lifecycle

Section Info Here

2.3.1. Container Lifecycle

2.3.2. Inspect a Container

2.3.3. Stop a Container

2.3.3.1. Stop a Container Gracefully

2.3.3.2. Stop a Container Forcefully

2.3.3.3. Pause a Container

2.3.4. Restarting a Container

2.3.5. Remove a Container

Chapter 3. Container Images

3.1. Container Image Registries

3.1.1. Container Registries

3.1.2. The Containerfile

3.1.3. Red Hat Registry

3.1.3.1. Useful Container Images

3.1.4. Quay.io

3.1.5. Manage Registries with Podman

3.1.6. Manage Registry Credentials with Podman

3.2. Managing Images

Section Info Here

3.2.1. Image Management

3.2.1.1. Image Versioning and Tags

3.2.1.2. Pulling Images

3.2.1.3. Building Images

3.2.1.4. Pushing Images

3.2.1.5. Inspecting Images

3.2.1.6. Image Removal

Chapter 4. Container Networking

4.1. Container Networking Basics

Section Info Here

4.1.1. Container Networking Basics

4.1.2. Managing Podman Networks

4.1.3. Enabling Domain Name Resolution

4.1.4. Connecting Containers

4.2. Accessing Containerized Network Services

Section Info Here

4.2.1. Port Forwarding

4.2.1.1. List Port Mappings

4.2.2. Networking in Containers

Chapter 5. Persisting Data

5.1. Volume Mounting

Section Info Here

5.1.1. Copy-on-write File System

5.1.1.1. Implications of a COW File System

5.1.2. Store Data on Host Machine

5.1.3. Storing Data with Bind Mounts

5.1.3.1. Troubleshoot Bind Mounts

5.1.4. Storing Data with Volumes

5.1.5. Storing Data with a tmpfs Mount

5.2. Working with Databases

Section Info Here

5.2.1. Stateful Database Containers

5.2.2. Good Practices for Database Containers

5.2.3. Importing Database Data

5.2.3.1. Database Containers with Data-loading Features

5.2.3.2. Data Loading with a Database Client

5.2.4. Red Hat Database Containers

Chapter 6. Custom Container Images

6.1. Create Images with Containerfiles

Section Info Here

6.1.1. Creating Images with Containerfiles

6.1.2. Choosing a Base Image

6.1.3. Containerfile Instructions

6.1.4. Container Image Tags

6.2. Build Images With Advance Containerfile Instructions

Section Info Here

6.2.1. Advanced Containerfile Instructions

6.2.2. The ENV Instruction

6.2.3. The VOLUME Instruction

6.2.4. The ENTRYPOINT and CMD Instructions

6.2.5. Multistage Builds

6.2.6. Examine Container Data Layers

6.2.6.1. Cache Image Layers

6.2.6.2. Reduce Image Layers

6.3. Rootless Podman

Section Info Here

6.3.1. Container Workload Isolation

6.3.2. Analyzing Rootless Containers

6.3.2.1. Changing the Container User

6.3.2.2. Explaining User Mapping

6.3.2.3. Limitations of Rootless Containers

Chapter 7. Multi-Container Applications with Compose

7.1. Compose Overview and Use Cases

Section Info Here

7.1.1. Orchestrate Containers with Podman Compose

7.1.2. The Compose File

7.1.2.1. Start and Stop Containers with Podman Compose

7.1.3. Networking

7.1.4. Volumes

7.2. Build Developer Environments with Compose

Section Info Here :pygments-style: tango :source-highlighter: pygments :toc: :toclevels: 7 :sectnums: :sectnumlevels: 6 :numbered: :chapter-label: :icons: font :icons: font :imagesdir: ./images/

Chapter 8. Troubleshooting Containers

8.1. Container Logging and Troubleshooting

Section Info Here :pygments-style: tango :source-highlighter: pygments :toc: :toclevels: 7 :sectnums:
:sectnumlevels: 6 :numbered: :chapter-label: :icons: font :icons: font :imagesdir: ./images/

8.2. Remote Debugging Containers

Section Info Here :pygments-style: tango :source-highlighter: pygments :toc: :toclevels: 7 :sectnums:
:sectnumlevels: 6 :numbered: :chapter-label: :icons: font :icons: font :imagesdir: ./images/

Chapter 9. Container Orchestration with OpenShift and Kubernetes

9.1. Deploy Applications in OpenShift

Section Info Here :pygments-style: tango :source-highlighter: pygments :toc: :toclevels: 7 :sectnums: :sectnumlevels: 6 :numbered: :chapter-label: :icons: font :icons: font :imagesdir: ./images/

9.2. Multi-pod Applications

Section Info Here
